

## Conversation Transcript

User:

I'm looking for a sentence or two describing what AI is for an AI policy in my classes.

Assistant:

Here's a concise and student-friendly definition you could use in your AI policy:

Artificial Intelligence (AI) refers to computer systems designed to perform tasks that typically require human intelligence—such as understanding language, recognizing patterns, solving problems, or making decisions. In academic settings, AI tools can assist with writing, research, and organization, but their use must follow ethical guidelines and course-specific rules.

Would you like a version tailored for a syllabus, assignment sheet, or departmental policy document?

User:

Is there a way of sharing a link to this conversation?

Assistant:

There isn't a direct "share link" feature for this conversation, but here are a few easy ways you can share it:

1. Copy and Paste: You can copy the relevant parts of the conversation and paste them into an email, document, or chat message.
2. Screenshot: Take a screenshot of the conversation and share it as an image.
3. Export to File: If you'd like, I can generate a clean PDF or text file of this conversation for you to share. Just let me know your preferred format.

Would you like me to prepare a file version of this conversation now?
